

No.	Function
Speed Sensor	
1	V+ (Yellow / Red)
2	Signal "B" (Blue)
3	Signal "A" (White)
4	V- / GND (Black)
Temperature Sensor	
1	Terminal "+" (Red)
2	Terminal "-" (Black)

Instruction:

- Viewed from the spline end, when the alphabetical sequence of the lead terminals is the same as the power supply phase sequence, the motor rotation direction is counterclockwise.
- The output of speed sensor is 64 square wave pulse signals per revolution.
- "△" is the sign of modification.
